Directorate / Region	RMO-Goldfields Esperance Region	**Main Roads or Contractor**	Contractor
EQSafe Event Type	Damage / Loss	**EQSafe Incident Number**	57937
Actual Consequence	Moderate	**Potential Consequence**	Major

Incident Short Description	Truck rollover

What Happened

A spreader truck was travelling westbound on South Coast Highway to a pavement repair location with a partial load of aggregate in the truck body and towing a float with a multi tyre roller. As the truck came around a corner at ~80km/h, the truck lost traction on the slick/wet surface of the road. The truck and trailer slid sideways and eventually the truck flipped onto its side and the roller was thrown from the float.

Traffic management and supervisor arrived within 15 minutes. Traffic control was established. Heavy vehicle recovery specialist arrived and commenced recovery. Drug and alcohol testing completed (negative). Driver taken for health check and confirmed as having no injuries.

Photo of Truck, position after detachment from trailer and recovery commenced

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated / shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
