

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	01/03/2023	Time of Incident:	1:10pm
Directorate / Region:	SWR	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Injury / Illness	EQSafe Incident Number:	30244
Actual Consequence:	Moderate	Potential Consequence:	Moderate

Incident Short Description:	Foreign Material in Eye
------------------------------------	-------------------------

What Happened:

On the 1st of March at approximately 1:10pm, a truck mounted concrete line pump was being used to pump a cement grout mixture into a revetment mattress on a project. After the last concrete truck for the day had unloaded, cleaning of the pump began. 1 of 2 site water carts were called to the pump work area to add water to the concrete pump loading hopper to assist with the cleaning operations. A blockage in the 2-inch outlet hose was identified on the concrete pump. The pump operators tried to unblock the hose at the mattress injection end but could not. It was decided to then reverse the pump.

The 1st reverse of the pump released a small back spill from the loading hopper. The 2nd reverse of the pump resulted in a more forceful release of water and cement slurry from the loading hopper which covered the water cart operator and caused debris to enter his eyes from underneath his safety glasses, leading to eye irritation.

View of scene after incident

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Hazardous Substances**.
