EQSafe Event Type:	SHW Incident – Injury/Illness	EQSafe Incident Number:	32997
Actual Consequence:	Moderate	Potential Consequence:	Moderate

Incident Short Description:	Worker injured back while moving a frame for water tank to be used in the coring vehicle
------------------------------------	--

What Happened:

On 2nd August at approximately 12:46, a worker (IP) injured their back while moving a frame for a water tank that is used in the coring vehicle. The frame was located on the floor and was to be moved onto a pallet for storage whilst work was being conducted on the coring vehicle.

The frame being 800mm x 600mm x 300mm and weighing approximately 14kg.

The IP contacted their manager for assistance. Their GP certified IP unfit for work resulting in an LTI

Frame which was lifted in the incident

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this risk (and is not reflective of this specific incident):

- Review manual handling techniques for awkward, heavy items and identify any additional controls required*
- Ensure correct manual handling techniques are used*
- Ensure workers are aware of reporting requirements and injury management process*
