

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	15 March 2024	Time of Incident	13:40
Directorate / Region	Goldfields Esperance	Main Roads or Contractor	Contractor
EQSafe Event Type	Incident – Lost Time	EQSafe Incident Number	38810
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Worker fell from position standing on axle of low loader to the ground
-----------------------------------	--

What Happened

On 15th March at approximately 13:40, a worker (IP) had reversed slasher onto low loader (skid steer loader with slasher attachment). IP was attaching straps to slasher and had placed their foot on top of the axle of the low loader and was trying to attach a tie down hook to the bucket. IP's foot slipped on the axle end and they fell approximately 300-400mm to the shoulder of the road, directly onto their hip.

IP then crawled under the truck to make sure they were clear of the road and made contact with their Supervisor. IP was taken to hospital by ambulance.

Slasher in position for strapping (location of foot position marked)

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
'Fall from Height'
