WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	18/03/2024	Time of Incident	7:10am
Directorate / Region	RMO – Pilbara	Main Roads or Contractor	Contractor
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	38828
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	A truck operator sustained serious burns
-----------------------------------	--

What Happened

On the 18th March 2024 at 7:10am, works were being conducted North of Newman on Great Northern Highway. A Truck Operator who was the Injured Person (IP) had noticed a warning light had activated on the vehicle dashboard, whilst the IP was driving.

The IP had stopped the vehicle to investigate why the warning light had activated. The IP removed the engine radiator cap and was sprayed with hot coolant from the radiator tank, which resulted in serious burns to their arm.

The IP called the Works Supervisor who contacted their HSE Advisor to drive out to the work site and provide first aid assistance.

The HSE Advisor drove the IP approximately 50km to Newman Health Campus for treatment. On assessment, the treating physician has arranged for the IP to be flown to Perth by the Royal Flying Doctors Service (RFDS) for further medical treatment.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Mobile Plant
