SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	15 May 2024	Time of Incident	6.05pm
Directorate / Region	RMO – Pilbara	Main Roads or Contractor	Contractor
EQSafe Event Type	Damage / Loss	EQSafe Incident Number	40454
Actual Consequence	Insignificant	Potential Consequence	Major

Incident Short Description	Vehicle hits livestock travelling from site to accommodation
-----------------------------------	--

What Happened

At 5.35pm on Wednesday 15 May 2024, a contractor (Injured Person - IP) has left the site office to return to their accommodation located approximately 50kms away.

The IP was driving a work ute at a speed of 106km/hr when they have noticed a herd of cattle approximately 70m ahead on the left side of the road.

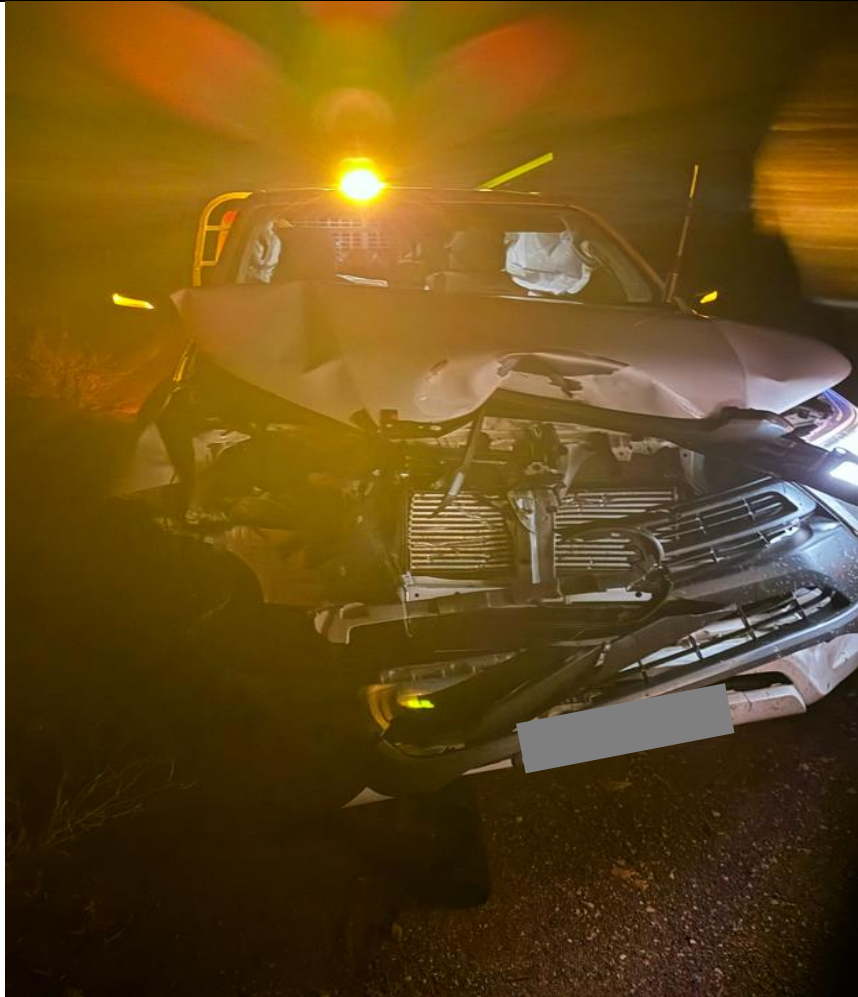

The IP has begun to slow down and two of the cows have started to run towards the road chasing each other. The first cow has seen the lights from the ute and has stopped in the middle of the left live lane.

To avoid hitting the cow, the IP has attempted to switch to the right lane, however the second cow has continued to run across the road. The work ute has then struck this cow at an estimated speed of 70km/hr.

The IP has stopped the vehicle in the right lane and has exited the vehicle. The cow has walked off into the bush, seemingly uninjured.

The IP has reported the incident and was taken to the nearest hospital for medical assessment, where it was confirmed that there were no injuries sustained.

The front of the vehicle has been heavily damaged.

Heavy damage sustained to front of vehicle.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
