

**RED BANNER ALERT****SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	24/05/2024	Time of Incident	08:00am
Directorate / Region	Pilbara RMO	Main Roads or Contractor	Contractor
EQSafe Event Type	Damage	EQSafe Incident Number	40615
Actual Consequence	Minor	Potential Consequence	Major

Incident Short Description	MOP collides with Contractor vehicle entering Site Office
-----------------------------------	---

What Happened

At approximately 8:00am on Friday 24th May a contractor vehicle heading north has slowed to turn into the site office for the Great Northern Highway Over Taking Lanes project.

As the contractor has slowed, a MOP vehicle travelling behind begins to overtake at high speed on the RHS side of the contractor's vehicle.

The contractor has become aware of the MOP vehicle and come to a stop so as not to be hit on the driver's side. The MOP has then aborted the overtake, and moved back into the left lane but impacted the contractor vehicle on the back left.

MOP vehicle has then left the road on LHS and the contractor vehicle has veered off the road coming to a stop after approximately 150meters.

No major injuries were sustained. MOP received a minor cut to the lip.

Police were called to the scene and the contractor was taken to Newman hospital for assessment.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles & Driving

Distribution of Notice	Main Roads Personnel and Contracting Organisations
