SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	31 May 2024	Time of Incident:	4:15 pm
Directorate / Region:	RMO – Kimberley	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Injury / Illness	EQSafe Incident Number:	40840
Actual Consequence:	Moderate	Potential Consequence:	Moderate

Incident Short Description:	Contractor drove their car off road after suspected medical episode.
------------------------------------	--

What Happened:

On Friday 31 May 2024 at approximately 4:15pm, a Contract Project Manager (Injured Person – IP) had left a project site intending to return to the office.

Whilst driving into town in a 50 km/hr zone, the IP became unconscious and drove their car off the road approximately 40-50m into nearby bushland. Damage was sustained the front and side of the vehicle. The vicinity in which the vehicle left the road was on vacant land.

The local police were routinely patrolling the area and saw the IP standing next to the damaged vehicle. The police assessed the IP, who was then transported to the nearby hospital. Later that evening, the IP was transported to another hospital for further evaluation, where they underwent a CT scan for back pain. The IP was discharged the next day and has since flown to Perth for further medical assessment.

Upon further investigation into the incident, it is unclear whether the IP was returning to the office or to their home. It has since been confirmed that the IP did not enter the depot or building on the Friday afternoon. The IP has no recollection of the events leading up to the incident.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with Main Roads Critical Risk profile relating to
Vehicles and Driving
