SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	15 July 2024	Time of Incident	3:30pm
Directorate / Region	RMO – Mid West Gascoyne	Main Roads or Contractor	Contractor
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	42457
Actual Consequence	Moderate	Potential Consequence	Major

Incident Short Description	Traffic Controller's vehicle involved in rollover whilst journey to campsite 7 hours away.
-----------------------------------	--

What Happened

At approximately 3:30pm, a team of Traffic Controllers (TC) were travelling in a convoy of 4 vehicles contractor campsite about 7 hours away.

The last vehicle in the convoy has lost control of the vehicle and travelled across two lanes of traffic, and the vehicle has rolled 2.5 times landing on its roof.

The Injured Person (IP) extricated themselves from the vehicle and asked witnesses for assistance.

Upon arrival at the scene, the contract crew leader has set up an 80km/hr speed restriction and contacted emergency services. The contractor emergency response team were also deployed to the incident location.

The IP was immediately taken to hospital for assessment. It was believed that they may have broken their collarbone, however, X-rays have confirmed that there were no injuries, and they were discharged from hospital the next day.

'For Cause' Alcohol and Other Drugs testing were conducted on the 3 workers in convoy, however, the IP was unable to be tested as they were enroute to hospital. The 3 traffic controllers were taken to Cue for overnight accommodation.

Images of incident scene

WorkSafe were notified and formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
