

**RED BANNER ALERT****mainroads**
WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	4th February 2025	Time of Incident	12:30 PM
Directorate / Region	RMO – Pilbara	Main Roads or Contractor	Main Roads
EQSafe Event Type	Near Miss	EQSafe Incident Number	48009
Actual Consequence	Insignificant	Potential Consequence	Major

Incident Short Description	Near miss from light vehicle overtaking 3 stationary trucks and running a red light
-----------------------------------	---

What Happened

At approximately 12.30 PM, 3 trucks were stopped at the northern end TC lights while it was on red. A light vehicle (LV) has approached the northern traffic set, overtaken 3 stationary trucks and ran the red light. The TC located at the northern lights alerted the workers via two-way by repeating twice "car ran through my red light".

TC supervisor contacted the seal crew asking if they could stop the driver, however they were not in a position to do so. During this time the driver saw the pilot and other vehicles approaching from the opposite direction, so has moved into the working lane and came to a stop.

The TC supervisor drove down the working lane and informed the driver of his wrongdoing. Main Roads Liaison Officer heard the conversation over the two-way radio and arrived at the driver's location shortly after the TC supervisor. The driver was showing signs of aggression and was asked to calm down. The driver argued that there was poorly placed signage for road works occurring in the area.

The Liaison Officer asked for the TC supervisor to guide the driver back down to the northern traffic lights and to video the location of the signage on his way down to view what the driver had observed.

A formal ICAM has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Interaction with Live Traffic
