SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	13 th January 2026	Time of Incident	06:30
Directorate / Region	RMO - Wheatbelt	Main Roads or Contractor	Main Roads
EQSafe Event Type	Injury/ Illness	EQSafe Incident Number	57515
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Roadworker reports sore back resulting in LTI
-----------------------------------	---

What Happened

Following the Maintenance prestart meeting on the 13th of January 2026, a Roadworker (IP) informed their supervisor that they were experiencing back pain. Concerned for the IP's welfare, the supervisor moved the IP to a Light Vehicle for the day.

At the time of advisement, the IP did not notify the supervisor as to what was causing the pain.

The IP attended a doctor on the 13th of March due to increasing pain and was issued a First Certificate of Capacity which declared them to have no capacity to work for 14 days due to a back injury. Incident is reportable to WorkSafe as the Injured Person is unable to do their normal work for at least 10 days.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
