SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	14 April 2026	Time of Incident	12:20 PM
Directorate / Region	RMO – Mid West – Gascoyne Region	Main Roads or Contractor	Contractor
EQSafe Event Type	Near Miss	EQSafe Incident Number	58035
Actual Consequence	Insignificant	Potential Consequence	High

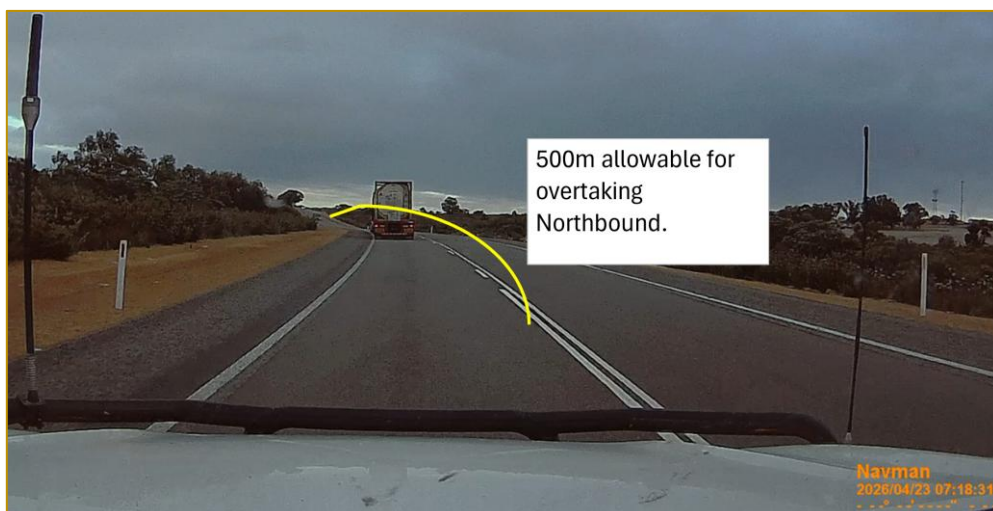

Incident Short Description	Near miss while overtaking – Vehicle Incident
-----------------------------------	---

What Happened

On Tuesday 14 April 2026 at approximately 12:20 PM, an empty 8-wheel tipper (Truck 1) travelling northbound attempted an overtaking manoeuvre in a section of road with only around 500 metres of broken white line marking. At the same time, a loaded double side tipper (Truck 2) was travelling southbound in a 110 km/h speed zone at approximately 90 km/h, transporting gravel material. Both heavy vehicles were associated with the project works.

Truck 2 was clearly visible to Truck 1 when Truck 1 commenced the overtaking manoeuvre. After overtaking two vehicles, Truck 1 was unable to safely complete the manoeuvre and was forced to return to the northbound lane. Truck 1 narrowly merged back into the traffic stream approximately 80 metres from the oncoming Truck 2. One of the northbound light vehicles had reduced its speed to create a gap for Truck 1 to move into. At the same time, the operator of Truck 2 had moved the left wheels onto the gravel shoulder and slowed as much as possible to increase separation.

Approximately one kilometre further north, Truck 1 again attempted an overtaking manoeuvre, this time passing another heavy vehicle within a short overtaking section on the approach to a crest, where sight distance was limited.

**Northbound View at Overtaking Location**

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
