WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	22/5/2026	Time of Incident	7:00 AM
Directorate / Region	Wheatbelt	Main Roads or Contractor	Main Roads
EQSafe Event Type	Injury/Illness	isafe Incident Number	INC-0210
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Worker tripped and fell, resulting in fractured ribs
-----------------------------------	--

What Happened

On the morning of the 22nd May, a worker was loading a truck with bags of cold mix (approx. 15kg bags) from a pallet in the depot shed. The worker had shifted the plastic wrapping from the pallet to the rear of the area while they carried some bags from the front of the pallet. The worker then went to the rear of the pallet, picked up a bag, and walked towards truck. The worker has got their foot caught in the plastic wrapping and fallen onto the LHS of their body whilst holding onto the bag of cold mix also to the left-hand side of the body.

Although sore, the worker continued to work, however, by 1:00 PM the pain hadn't eased and the worker rang their supervisor and reported the incident. The worker attended local hospital on Monday 25/05/26 and was found to have 3 broken ribs, resulting in an LTI.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
