Directorate / Region	HVS	Main Roads or Contractor	Contractor
isafe Event Type	Injury	isafe Incident Number	INC-0234
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Traffic Escort Warden experienced muscle spasm while driving, resulting in LTI
-----------------------------------	--

What Happened
A Traffic Escort Warden (IP) was on his 4th day of escorting between Welshpool to Newman (including return journey) when he experienced pain and stiffness in the right side of his neck. The IP arrived home on the evening of 28th May, and when the pain persisted, they attended their doctor on the following day who diagnosed a muscle spasm and declared them unfit for work for 7 days, resulting in an LTI. A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

Distribution of Notice	Main Roads Personnel and Contracting Organisations
