| <b>Incident Short Description</b> | Worker fell whilst pulling a branch off the roadside, resulting in a sprained knee. |
|-----------------------------------|-------------------------------------------------------------------------------------|

**What Happened**

On the morning of 4<sup>th</sup> June, the Ravensthorpe Routine Maintenance crew were 17km west of the depot clearing debris from the side of the road along the South Coast Hwy following the recent windy weather.

The injured person (IP) was moving cuttings of branches from the shoulder into the bush, however, as the IP was moving a branch, it became caught on other vegetation.

The IP put more force into pulling the branch, and the branch suddenly came free, resulting in the IP losing their balance. The IP then fell onto other branches and the ground, landing on their right leg and lower back, resulting in a sore right knee and grazes to their lower back.

***Location of the fall***

The fall was witnessed by other crew members involved in removing the branches. The Leading Hand notified the Supervisor, who took the IP to the hospital for an assessment.

OFFICIAL

The doctor assessed the IP and diagnosed a sprained knee, with the worker having no capacity to work for **14** days.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
