Directorate / Region	South West Region	Main Roads or Contractor	Contractor
isafe Event Type	Injury	isafe Incident Number	INC-0270
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Traffic Controller sustains ankle injury, resulting in a Lost Time Injury
-----------------------------------	---

What Happened
On Sunday 7 June 2026, at 8:00 PM, whilst conducting traffic control works for shoulder grading, a Traffic Controller (TC) was walking towards their designated post when they rolled their ankle whilst walking on the grassed area to the left of Western Power's driveway. The TC felt pain immediately and swelling to their ankle occurred shortly after. The TC contacted the Crew Leader (CL) and was taken to the emergency department for assessment. The TC was diagnosed with an ankle injury and deemed unfit for duties for 7 days, resulting in a Lost Time Injury (LTI). A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
