SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	20 May 2026	Time of Incident	9:00 AM
Directorate / Region	RMO Mid-West Gascoyne	Main Roads or Contractor	Main Roads
isafe Event Type	Injury / Illness	isafe Incident Number	INC-0189
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Worker sustains back injury while loading sign poles, resulting in LTI
-----------------------------------	--

What Happened
A maintenance team loaded sign poles onto a Shire truck in Carnarvon before travelling to Gascoyne Junction to undertake other planned works. Upon arriving on site, a worker advised the Crew Leader that their back felt tight. The Crew Leader asked if they were fit for work, and the worker confirmed that they were. The team continued working and completed their shift. The following morning, the worker reported to the Crew Leader that they were experiencing significant back pain and were not fit for work. The Crew Leader contacted the Supervisor, and the worker was transported to Carnarvon for medical assessment where they were given pain medication. The assessing doctor provided a medical certificate stating the worker was 'unfit for work' on 21st and 22nd May, resulting in a Lost Time Injury (LTI). A subsequent WorkCover Certificate was obtained on 25 May deeming the worker 'unfit for work' from 25th May to 29th May. A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
