

1. INTRODUCTION

1.1 Purpose and Scope

This Non-Complex Traffic Management Plan and associated plans are designed to outline the general traffic management procedures and controls required for the safe delivery of Traffic Management for general works on the Main Roads Network in the State of Western Australia (Figure 2) but has been specifically designed for maintenance activities in the below region (Figure 3).

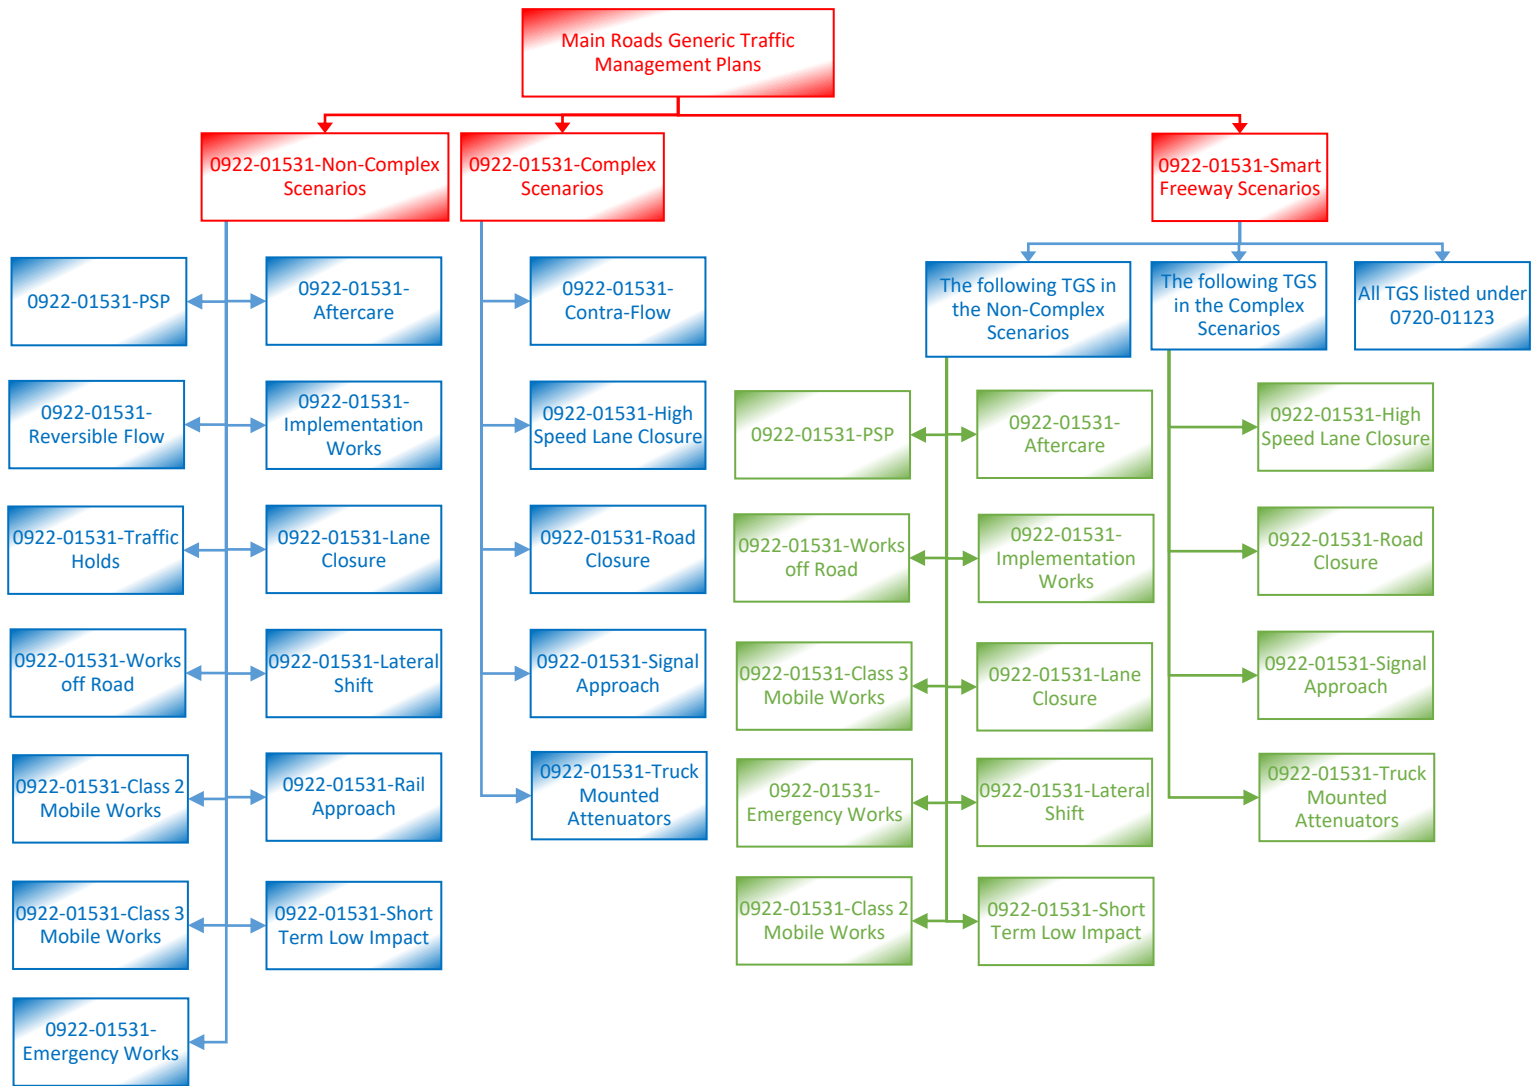

Figure 1: Traffic Management Plan and Traffic Guidance Scheme Relationship Chart

This Non-Complex Traffic Management Plan was designed to cover generic setups for most applications on the Main Roads Western Australian Road Network. This Traffic Management Plan should be used where complex situations, as defined in the Main Roads Code of Practice (Traffic Signals, Road Closures, Contra-flow and High-Speed Lane Closures) do not apply.
