

Other Constraints	The Main Roads Network within the State of Western Australia contains many complex roads and intersections. The Traffic Management Assessor or Delivery Supervisor must provide additional site-specific risks and mitigations as required. It is recommended that a site-specific risk assessment is provided on site to determine whether the works can be completed safely. Where there are impacts on other networks such as rail, buses or heavy vehicles additional advice, notification and/or approvals may be required.
Concurrent and/or Adjacent Projects	Delivery Supervisor is to issue suitable Notification of Roadworks as per the MRWA Code of Practice and where concurrent or adjacent works may impact the worksite, every effort made to liaise with project managers to ensure there are no conflicts.

2.3 Existing Traffic and Road Environment

ITEM	DESCRIPTION
Traffic Volume and Composition	These details will vary depending on the project, locations, and stage of works. The Traffic Management Assessor or Delivery Supervisor must undertake a traffic analysis for the proposed setups to determine hours and days of works. Details must be provided for the safe management of vulnerable road users at each location of works, if impacts will occur to facilities.
Existing road configuration	
Existing pedestrian / cyclist facilities	

2.4 Overview of Proposed TTM

ITEM	DESCRIPTION
Temporary Traffic Management Descriptions	These details will vary depending on the project and the Traffic Management Assessor or Delivery Supervisor will provide specific scenarios. This Traffic Management Plan covers the following Non-Complex scenarios, but the project may not require all scenarios: <u>Non-Complex Traffic Management Plan</u> • Aftercare Arrangements • Indicative Implementation Drawings • Lane Closure Setups • Lateral Shift Setups • Principal Shared Path Setups • Reversible Flow Setups • Traffic Hold Setups • Works off Road • Rail Approaches • Mobile Scenarios Class 2 & 3 • Short-term Low Impact • Emergency Works
Speed zone dates and times	These details will vary depending on the project, location, and length of works. The Traffic Management Assessor or Delivery Supervisor must address the dates and times prior to the implementation of any traffic management.
Lane Closures dates and times	
Road Closures dates and times	
Traffic Control dates and times	
Signal modifications description	Where any of the following criteria is met, the 0922-01532-Complex Traffic Management Plan must be used: • Alteration to the function of the traffic signals or sign display. • Closure of a traffic lane where:
