3.2. 14		Reversible Flow / Traffic Control Procedures / Portable Traffic Control Devices / Traffic Holds									
3.2. 14	1 G	Traffic Controllers operating stop/slow arrangements and outside of voice audibility of other Traffic Controllers causing traffic to be released into an opposing traffic stream resulting in serious injury or fatality.	Serious injury or fatality to road users.	C	4	H12	All Traffic Controllers operating stop/slow have a duty to operate hand held radios and deliver clear and concise messages to ensure that the correct release procedures occur on site. Traffic Controllers operating stop/slow must have adequate breaks/rotations to maintain vigilance when at a traffic control point. Refer to section 4.1.7 of this TMP for the use of Portable Traffic Control Devices on the Main Roads network. Where traffic controllers are used they must ensure the following: - That an adequate escape route is available at all times. - 'Prepare to stop' and Symbolic Traffic Controller signs are installed in advanced of Traffic Control position.
