

Continuous Signage Implementation – TGS-IW-002 Scenario 1	IW-008A
Continuous Signage Implementation – TGS-IW-002 Scenario 2	IW-008B
Continuous Signage Implementation – TGS-IW-002 Scenario 3	IW-008C
Lane Closure Setup with Live Traffic Lane Switch	IW-009
Side Road Inset Drawings (All Scenarios)	** -I01
End of Queue Protection Guidance Drawings	RF-022, 023 &044

7.1.6 Traffic Management Setups to be used in Emergency Scenarios Only

These drawings may be used for Emergency Scenarios only and must not be used for planned works.

Table 47: Traffic Management Setups to be used in Emergency Scenarios Only

Traffic Management Type	TGS Number
Emergency Response Signage Table of Contents	EW-000
Minor 4-way Intersection Road Closure Point	EW-001
Minor 3-way Intersection Road Closure Point	EW-002
Major 4-way Intersection Road Closure Point	EW-003
Major 4-way Intersection Road Closure Point	EW-004
Reversible Flow – Two-way Road	EW-005
Lane Closure – Multilane Road	EW-006
Verge Works – Two-way Road	EW-007
Control of Access Highway / Freeway Road Closure Point	EW-008
Control of Access Highway / Freeway Overpass On-ramp Closure Point	EW-009
Control of Access Highway / Freeway Off-ramp Closure Point	EW-010
Minor 4-way Intersection Road Closure Point	EW-011
Minor 4-way Intersection with 40km/h Speed Reduction – Road Closure Point	EW-012
Minor 4-way Intersection with 60km/h Speed Reduction – Road Closure Point	EW-013
Minor 4-way Intersection with 40km/h Speed Reduction – Pre-Closure Point	EW-014
Minor 4-way Intersection with 60km/h Speed Reduction – Pre-Closure Point	EW-015
Verge Works with 40km/h and 60km/h Speed Reduction	EW-016
Shuttle Flow Scenarios with 40km/h Speed Reduction	EW-017
Road Closure Scenarios with 40km/h Speed Reduction	EW-018
Road Closure Scenarios with 40km/h Speed Reduction with Detour	EW-019
Road Closure Scenarios with 60km/h Speed Reduction with Detour	EW-020

Below is a list of the non-complex drawing categories and their current revision.
