

8.2 Emergency Services

Notification to the Emergency services via DFES of the proposed works nature, location, date and times as well as contact details for the site supervisor.

On-site traffic controllers will be equipped with mobile communications to advise and/or liaise with emergency services to ensure a prompt response should the need arise.

8.3 Dangerous Goods

Should any incident arise involving vehicles transporting dangerous goods, all work shall cease immediately, machinery and vehicles turned off and the area cleared of personnel as soon as possible. Immediate deployment of traffic controllers (and other personnel if necessary) to ensure no traffic or other road users approach the area.

Notification must be provided to the Emergency services via DFES of the proposed works nature, location, date and times as well as contact details for the site supervisor. Completion of a briefing to all site personnel on evacuation and control procedures is required.

8.4 Damage to Services

In the event of damage to gas services, all work shall cease immediately. Machinery and vehicles turned off, and the area cleared of personnel as soon as possible. Immediate deployment of traffic controllers (and other personnel if necessary) to ensure no traffic or other road users approach the area. Notification to the Police services and relevant supply authority is immediately required. Damage to any other services shall be treated in a similar manner except machinery may remain operational and access may be maintained where it is safe to do so. Completion of a briefing to all site personnel on evacuation and control procedures is required.

8.5 Failure of Services

8.5.1 Failure of Traffic Signals

In the event that damage to traffic signal infrastructure and signals fail to operate or operate incorrectly, all work shall cease immediately. Deployment of traffic controllers (and other personnel if necessary) to control traffic movements through the intersection is immediately required. Main Roads Western Australia - Road Network Operations Centre (RNOC) shall be notified immediately on telephone number 138 111.

8.5.2 Failure of Street Lighting

In the event of damage to the street lighting and fails to operate or operates incorrectly, traffic controllers (and other personnel if necessary with appropriate temporary lighting) shall be deployed immediately. If the lighting failure adversely affects road user safety, traffic controllers are to control traffic movements as required. Immediate notification to Western Power is required.

8.5.3 Failure of Power

In the event that the damage to a power infrastructure poses a risk through live current, immediate deployment of traffic controllers (and other personnel if necessary) is required to secure the site and prevent entry to the area affected by live power. Immediate notification is required to Western Power via telephone number 13 13 51.
