

3.4 Plan and Design

3.4.1 Plan and design selected risk treatment

Addition

A signature on the TMP or TGS(s) may be electronic.

4 Documenting Traffic Management Plans

4.7 Traffic management planning and design

4.7.3 Traffic Guidance Schemes

Addition

A TMD may apply tolerances (see AGTTM Part 6 Section 6.8) to the spacing requirements or increase the spacing requirements in accordance with QGTTM Part 3 Section 2.5.3 for signs and devices when preparing the design of a TGS. See Figure 4.7.3 for the tolerances that apply to a sign spacing.

If a TMD applies a tolerance, which is either the minimum or maximum allowable (as AGTTM Part 6 Section 6.8), or is so close to the maximum or minimum such that a TMI also applying the maximum tolerance as per AGTTM Part 6 Section 6.8 on site may exceed the total allowable tolerance, or uses the provisions of QGTTM Part 3 Section 2.5.3, the TMD must specify this distance as either a minimum or maximum (or provide the maximum or minimum value) on the TGS so that a tolerance is not also applied on site by the TMI which would then exceed any applicable limits.
