

Guide to Temporary Traffic Management Part 7: Traffic Controllers

Edition 1.1 prepared by: Thuan Nguyen

Edition 1.1 project manager: Chris Koniditsiotis

Abstract

Austrorads' Guide to Temporary Traffic Management (AGTTM) details contemporary temporary traffic management practice for application in Australia and New Zealand. It provides guidance for the planning, design and implementation of safe, economical and efficient temporary traffic management designs. This Guide recognises the level of variability of the road environments for which guidance is provided. The guidance provided in AGTTM is intended to encourage a consistent level of planning that supports the streamlined safe progress of work. It applies to all works on roads and near roads, in addition to off road development and other activities that interact with and impact on the road environment.

AGTTM has been developed based on best practice temporary traffic management practice in Australia and New Zealand, to assist road authorities to meet their existing legislative responsibilities for workplace and public safety.

Part 7 details contemporary traffic controller practices including information about training information, control instructions and devices.

Keywords

Temporary traffic management, road hierarchy, worksite, traffic control, risk assessment, safety

Edition 1.1 published September 2021

Edition 1.1 contains additional information regarding the use of the Prepare to Stop sign, additional cones/bollards when the worksite has no line marking and correction to errors in some diagrams and figures.

Edition 1.0 published December 2019

ISBN 978-1-922382-97-9

About Austrorads

Austrorads is the peak organisation of Australasian road transport and traffic agencies.

Austrorads' purpose is to support our member organisations to deliver an improved Australasian road transport network. To succeed in this task, we undertake leading-edge road and transport research which underpins our input to policy development and published guidance on the design, construction and management of the road network and its associated infrastructure.

Austrorads provides a collective approach that delivers value for money, encourages shared knowledge and drives consistency for road users.

Austrorads is governed by a Board consisting of senior executive representatives from each of its eleven member organisations:

- Transport for NSW
- Department of Transport Victoria
- Queensland Department of Transport and Main Roads
- Main Roads Western Australia
- Department for Infrastructure and Transport South Australia
- Department of State Growth Tasmania
- Department of Infrastructure, Planning and Logistics Northern Territory
- Transport Canberra and City Services Directorate, Australian Capital Territory
- The Department of Infrastructure, Transport, Cities and Regional Development
- Australian Local Government Association
- New Zealand Transport Agency.
