

Table 2.1: Australia and New Zealand Clothing Standards

AS/NZ Reference	Description
AS/NZS 1906.4	- Retro-reflective materials and devices for road traffic control purposes - Part 4: High-visibility materials for safety garments
AS/NZS 2210	Safety, protective and occupational footwear
AS/NZS 4602.1	- High visibility safety garments - Part 1: Garments for high risk applications

Summarised in Table 2.2, AS/NZS 1906.4 provides classification for high visibility materials according to their day or night-time application.

Table 2.2: Classification of visibility materials (AS/NZS 1906.4)

Classification	Description
Class F	High daytime visibility fluorescent material
Class F (W)	High daytime visibility fluorescent material that has met both the requirements for Class F material and an optional wet weather test
Class R	Retro-reflective material for use on garments used in dark conditions
Class RF	Combined performance retro-reflective/fluorescent material meeting all of the requirements of Class R and the daytime colour of Class F
Class NF	High daytime visibility non-fluorescent material

Monitoring of traffic controller safety attire by site supervisors and employers

Traffic controller employers and site supervisors have an obligation to monitor traffic control stations closely to ensure that the traffic controllers at the site are adequately attired and equipped for the prevailing climatic and site conditions.

Traffic controllers must be made aware of any hazardous road surfacing operations at the site, so that traffic control stations are not placed nearby. Accordingly, this Guide does not provide any suitable clothing options for performing STOP / SLOW traffic control duties in close proximity to hot asphalt operations.

No traffic controller must be placed in an unsafe situation because of inadequate preparation. For example, a traffic controller removing their high visibility safety garment in order to achieve the comfort needed to continue to perform STOP / SLOW duties on a very hot day.

2.6 What to Use

2.6.1 General

Traffic controllers may only use equipment specified in this Guide to direct or divert traffic through a designated worksite. Therefore, it is imperative that traffic controllers familiarise themselves with the allowed equipment, signs and devices. Traffic control devices are to be operated in accordance with the manufacturer's operating procedures and instructions.
