

1.9 Variation to treatments and Registered Professional Engineer of Queensland certification

New

This Part of the *Manual* contains mandatory requirements (*shall*), recommendations (*should*) and options (*may*). The application of these mandatory requirements and recommendations is intended to provide the optimal level of safety and traffic efficiency. Variations to these treatments may be undertaken as follows:

- a) Where recommendations (*should*) are not adopted in preparing a TMP or TGS, the reasons must be based on sound temporary traffic management judgement and reasoning, and shall be documented through a risk assessment process to demonstrate the acceptability and safety of the varied approach. The a risk assessment, in accordance with the QGTTM shall be undertaken and signed by a TMD or an RPEQ.
- b) Where mandatory requirements (*shall*) are not adopted in preparing a TMP or TGS, the reasons must be based on sound temporary traffic management or traffic engineering judgement and reasoning, and shall be documented through a risk assessment process to demonstrate the acceptability and safety of the varied approach. The a risk assessment, in accordance with the QGTTM, shall be undertaken and signed by a TMD or an RPEQ.

In addition, both the risk assessment and the TMP and/or TGS shall be certified by a Registered Professional Engineer of Queensland (RPEQ) with at least a TMD competency.

The RPEQ is only required to certify that portion of the TMP and/or TGS design impacted by or related to departures from the mandatory requirement.

Where mandatory requirements (*shall*) are not adopted, the TMD preparing the TMP or TGS shall email notifications of variations to mandatory requirements (including all relevant information and RPEQ details) to TrafficEngineering.Support@tmr.qld.gov.au for information purposes and for the benefit of identifying potential future practice changes – not for approval or endorsement. These variations may include learnings that may be attributed to the variation of a *shall* requirement, such as operational, cost or safety impacts.
