

Addition

The ROADWORK ON SIDE road sign shall not be used where there is an impact for traffic on the through road. Impacts on the through road may include but not be limited to any need for reduced speed zones, additional delineation, changes to alignment or surface condition, use of traffic control or traffic queueing which extends onto the through road. Where there are impacts on the through road, the ROADWORK AHEAD sign (see Clause 4.6.2) should be used.

The ON SIDE ROAD message may be used to provide warning of an activity on another road which intersects with the road you are travelling on (this includes cross intersections and roundabouts but excludes the through / straight direction even if this is another road). However, the ON SIDE ROAD message shall not be used when you are travelling on the terminating leg of a T intersection to provide warning of an activity on the continuing leg of the T intersection. See Figure 4.6.7 below.
