

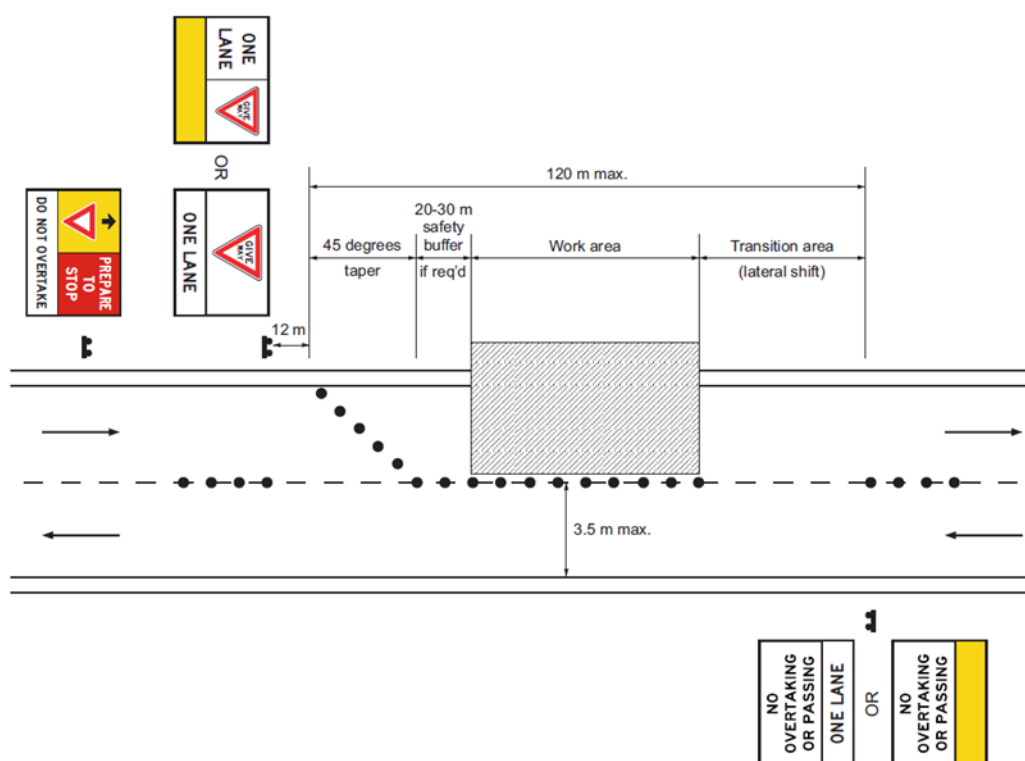

**Figure 5.4.4(a) – Example layout using GIVE WAY signs**

When GIVE WAY and ONE LANE signs are provided at one end of the shuttle lane (in accordance with this section), and advance warning of this arrangement is required, the Give Way Sign Ahead sign (W3-2 or WM3-2A in a multi-message sign assembly – see Figure 5.4.4(b)) should be used.

**Figure 5.4.4(b) – Advance PREPARE TO STOP sign for Give Way control**
