SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	20 January 2024	Time of Incident	0700
Directorate / Region	RMO – MWG	Main Roads or Contractor	Contractor
EQSafe Event Type	Procedure Breach	EQSafe Incident Number	37100
Actual Consequence	Insignificant	Potential Consequence	Major

Incident Short Description	Mobile Plant and Traffic Management Procedure Breach
-----------------------------------	--

What Happened

On Saturday 20 January at approximately 0630, a Traffic Controller failed to present to work to set up the Port Gregory Road, Northampton site to commence load and haul operations from a culvert. The excavator that was supposed to be delivered to the site to conduct the works had also not been delivered.

The contractor Site Supervisor then made the decision to commence works anyway.

The works were undertaken in a 110km/hr zone with no speed restrictions in place and no traffic controllers on site. The excavator that was used to commence the works belonged to a local farmer who agreed to assist.

The excavator had not been through a mobilisation/suitability assessment, it did not have a flashing light, the operator was not wearing high-vis, and the operator had also not inducted or had seen/signed on to the SWMS and Excavation Permit.

At approximately 0700, a Main Roads representative observed the works being undertaken without adequate traffic management set-up or equipment. Works were stopped and the contractor Representative was notified of the event.

A replacement Traffic Controller arrived at site at 0900, set up the traffic management devices and reduced the work area to a speed of 40km/hr. The contracted excavator and operator also arrived at site and works continued.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Mobile Plant
