

**RED BANNER ALERT****SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	2 February 2024	Time of Incident	01:00
Directorate / Region	MET – Metropolitan Region	Main Roads or Contractor	Main Roads
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	37426
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Maintenance worker suffers knee injury, resulting in LTI
-----------------------------------	--

What Happened
On Friday 2 February at approximately 01:00, maintenance crews had been working at the Morley Drive eastbound on-ramp to Tonkin Highway southbound. A maintenance worker IP (Injured Person) was crossing the road to continue manual sweeping tasks and has felt severe pain in the left knee. The IP and another maintenance worker have then left site, and the IP has presented at Joondalup Hospital for assessment, where the GP has confirmed the IP not fit for work for one week and has referred them for an MRI. The IP has then been re-assessed by a GP on 16 February who has further referred them to a specialist for surgical options on a medial meniscus tear and has confirmed no capacity for work until 15 March 2024. A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
