| <b>Incident Short Description</b> | Worker tripped and landed on knee |
|-----------------------------------|-----------------------------------|

**What Happened**

At approximately 12.30pm on Monday 8<sup>th</sup> April, a subcontractor (Injured Person – IP) has been checking a mobile crusher from the ground when he has tripped on a windrow at the discharge end of the crusher, landing on his knee.

The IP's knee has become swollen very quickly.

The Works Supervisor was notified of the incident and the IP was taken to Broome Hospital by a fellow worker. The Doctor has assessed the injury and ordered an x-ray be taken immediately, which confirmed that there was no damage to the bone.

The IP has been referred for an MRI and is currently not fit for duties.

*Windrow at discharge end of crusher*

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
