Directorate / Region	Pilbara RMO	Main Roads or Contractor	Contractor
EQSafe Event Type	Near Miss	EQSafe Incident Number	47857
Actual Consequence	Insignificant	Potential Consequence	Major

Incident Short Description	Heavy vehicle veers into oncoming traffic.
-----------------------------------	--

What Happened

On Sunday 2nd February at approximately 11:15am, a subcontractor road train operator was driving north between OTL2 and OTL3 on the Great Northern Highway project, approximately 30 kms out of Newman when his mobile phone fell on the floor of the truck cab.

The road train operator proceeded to bend down to retrieve the phone.

Whilst attempting to retrieve his phone the road train veered over the centre line into an on-coming subcontractor workshop light vehicle.

The light vehicle operator took immediate action and steered off the road to the left hand side into a sandy area. The road train operator steered the truck back into the correct lane and brought the truck to a stop in a safe area. No damage and or injuries were sustained to either operators or vehicles.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Interaction With Live Traffic
