**What Happened**

On 26<sup>th</sup> February 2024, a Leading Hand (IP) attended an intersection of the project site due to a report that a male resident had jumped on the side step of one of the Water Carts and had commenced abusing the female operator. On arrival at this location the IP observed a male person (local resident) digging a trench with a shovel across the width of one of the roads

The IP approached the male person and commenced speaking to him. As the IP spoke, the male person has turned around, making threats of harm to the IP, and jabbing him in the chest with the handle of the shovel. The IP swivelled on his feet attempting to avoid the handle, grabbing the shovel, and pulling the shovel from the male persons grasp. As the IP has turned to speak to the male person he has received a forceful blow to the left side of the jaw with a clenched fist.

The IP has staggered and both persons have fallen to the ground (male person on top) with the male person attempting to further strike the IP to the face with clenched fists. A nearby Traffic Controller has then intervened and dragged the male person off the IP. The male person then returned to his residence shouting abuse and threats to project workers in the area.

The Police called to manage the Member of public. IP attended the medics and had a scan at the regional hospital. IP required surgery to his jaw.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
