WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	31/03/2024	Time of Incident	11.00am
Directorate / Region	Kimberley	Main Roads or Contractor	Contractor (Direct Managed)
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	39142
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Back strain injury resulting in MTI
-----------------------------------	-------------------------------------

What Happened

At approximately 11.00am whilst working at SLK6500, a contractor (Injured Person – IP) was lifting a water pump onto the back of a work ute with the assistance of another worker.

The IP has felt a strain in his back so has stopped lifting and contacted his supervisor to report his injury. After the incident was reported, the Supervisor has driven the IP to the Halls Creek hospital for assessment by a Doctor.

The Doctor has provided a 'WorkCover WA – First Certificate of Capacity', advising that the IP can return to work on restricted duties.

The IP has had a follow up appointment with his Doctor on 8th April and remains on restricted duties until 12th April.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.
