WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	03/04/2024	Time of Incident	5.15pm
Directorate / Region	RMO – Mid West Gascoyne	Main Roads or Contractor	Contractor
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	39316
Actual Consequence	Moderate	Potential Consequence	Major

Incident Short Description	Light vehicle rollover during journey to site accommodation from project site
-----------------------------------	---

What Happened

At approximately 5.15pm on Wednesday 3rd April, the Injured Person (IP) was 40-45km from a project site on Indian Ocean Drive and driving north to north-west on Kailis Drive, Port Denison towards their accommodation. The speed limit was 80km/hr.

The IP states that sun glare has then caused loss of control of the vehicle, causing the vehicle to roll. Airbags were deployed during the incident and the light vehicle has been damaged beyond repair. St John Ambulance attended the incident site. The IP was taken to Dongara Medical Centre initially; however, they were then transferred to Geraldton Regional Hospital later that evening where they remained overnight.

X-rays have confirmed that the IP has suffered a cracked rib, and verbal advice at present is that the IP is unfit for full duties until 22nd April 2024.

WorkSafe has been notified of the incident and a formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles & Driving
