

**RED BANNER ALERT****mainroads**
WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	8 June 2024	Time of Incident	5:00pm
Directorate / Region	RMO – Midwest Gascoyne	Main Roads or Contractor	Contractor
EQSafe Event Type	Procedure Breach	EQSafe Incident Number	41039
Actual Consequence	Insignificant	Potential Consequence	Moderate

Incident Short Description	Crew returned positive BAC results and LV operator unlicensed
-----------------------------------	---

What Happened

On 8 June 2024, at approximately 4.00pm after tasks were completed for the day, a crew departed site for accommodation approximately 70km away.

Upon arrival at the accommodation, a supervisor conducted a breath test for a crew of three. Two members returned test results greater than 0.000. The other member returned a negative result, however, was found driving the Light Vehicle (LV) without a licence. All three personnel in breach were stood down and replacements arranged.

The following day, a project manager attended site and raised concerns that the replacement Traffic Controller (TC) could be under the influence. On 10 June 2024, a 'for cause' drug test was carried out prior to shift commencing, and the TC provided a non-negative test result. The TC did not follow through with a laboratory analysis, however, they did admit to illicit substance use and was consequently terminated from employment by their company's management.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
