

**RED BANNER ALERT****mainroads**
WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	11 June 2024	Time of Incident	09:00am
Directorate / Region	RMO – Pilbara	Main Roads or Contractor	Contractor
EQSafe Event Type	Damage / Loss	EQSafe Incident Number	41100
Actual Consequence	Insignificant	Potential Consequence	Major

Incident Short Description	OSOM vehicle breaches traffic management.
-----------------------------------	---

What Happened

An OSOM (Oversize Over Mass) vehicle has caused serious disruption and damage to equipment travelling through a project site.

The driver of the vehicle did not slow down for the roadworks and continued at well over the 40km speed restriction where they almost hit several construction workers. The vehicle hit all the traffic cones that were delineating the lanes and ran over a pipe laser causing damage.

The driver was contacted over the radio and advised to slow down and be mindful of workers. The driver responded with inappropriate language and disregard. Pilot vehicles were in place and made no radio contact with the site during the incident.

The driver was also contacted several times over the course of the roadworks and failed to follow any traffic conditions set out to make the roadworks safe for all.

WAPOL and Heavy Vehicle Services (HVS) have been contacted, and a formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Interaction with Live Traffic
