

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	7/09/2022	Time of Incident:	7:25
Directorate / Region:	CNR Kimberley Region	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Near Miss Injury	EQSafe Incident Number:	28225
Actual Consequence:	Insignificant	Potential Consequence:	Major

Incident Short Description:	A Padfoot Roller reversing with the door open, and Operator falls out of machine.
------------------------------------	---

What Happened:

An operator was reversing in a Padfoot Roller with door open due to no air conditioning. During this activity the operator was using a cushion on the seat because seating was uncomfortable, this was noted on the prestart form.

The Roller was situated on a slight slope and has hit a bump, with the operator falling out of machine while the roller has continued to roll back in gear. The operator had to quickly move their legs to avoid being crushed by the roller and was able to climb back into the moving roller to shut it off successfully.

The operator was checked for any injuries and monitored on site before the operator was stood down. No injuries were sustained.

Roller with door open and location of the fall

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Mobile plant and Fall from Height**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- *Communicate importance of ROPS and use of seat belts on mobile plant at toolbox meetings*
- *Ensure pre-start items are addressed when identified*

Distribution of Notice:

Main Roads Personnel and Contracting Organisations
