

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	15/09/2022	Time of Incident:	07:50am
Directorate / Region:	Kimberley Region	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Near Miss	EQSafe Incident Number:	28312
Actual Consequence:	Insignificant	Potential Consequence:	Major

Incident Short Description:	Light vehicle rollover on journey at end of worker's swing
------------------------------------	--

What Happened:

A vehicle with three (3) occupants left the remote camp 116km South of Halls Creek on the Duncan Road for an 8.5 hour trip back to Broome. This was the last day of a ten-day working swing.

At approximately 07:50am, 80km west of Halls Creek after a sweeping bend the contractor vehicle was travelling at 110km/h and approaching a vehicle towing a caravan which was travelling at a much slower speed.

The worker driving the vehicle had misjudged the speed of the caravan and tried to overpass. As they went to pass, there was another vehicle coming the other way, and has had to pull back in behind the caravan applying brakes and realising, the vehicle couldn't stop. The driver swerved towards the left side of the road across the shoulder and off the road.

During this motion the vehicle hit a culvert on the shoulder, subsequently the vehicle rolled approximately four times.

The driver and passengers escaped without injury. Another contractor vehicle travelling ahead was contacted to return and assist. The driver and passengers were placed into different vehicles, and they continued to return to base.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Vehicles and Driving**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- *Communicate the potential dangers associated with driver fatigue and provide examples of suitable controls for risk mitigation (taking rest breaks, adopting correct sleep patterns, driver aids, etc).*
- *Ensure workers obtain sufficient medical check-ups after a serious incident.*

Distribution of Notice:
