

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	12/09/2022	Time of Incident:	15:50
Directorate / Region:	Mid-West Gascoyne	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Injury/Illness	EQSafe Incident Number:	28329
Actual Consequence:	Moderate	Potential Consequence:	Major

Incident Short Description:	Worker in vehicle hit by member of public MOP vehicle during an attempted U-turn
------------------------------------	--

What Happened:
On Monday the 12th September, a paint crew had pulled over at Henry Rd (SLK333.2) to prepare the paint truck for painting so they could continue to paint Southbound centre line. The worker noticed the Advanced Warning Vehicle was behind the paint truck. The worker asked the Advanced Warning Vehicle to move 200m further north to allow room for the traffic mounted attenuator (TMA) to sit behind the paint truck at the correct distance and have the Advanced Warning Vehicle in the correct position. The Advanced Warning Vehicle turned around and headed back northbound for approximately 300m to get into the correct position. The Advanced Warning Vehicle moved onto the Northbound verge and commenced a U-turn to head Southbound, while pulling off the verge to complete the U-turn, the Advanced Warning Vehicle had pulled in front of oncoming traffic and hit by a member of public MOP vehicle sustaining significant damages to both vehicles. The worker in front received a call over the two-way from a passing truck telling worker "Check on their support vehicle as it has hit a car". The worker checked his mirrors and seen the Advanced Warning Vehicle stopped in the southbound lane. The worker and rest of the paint crew drove to incident site. Traffic management was set up, checked on persons involved and reported incident to the Police and management as require. The worker was then sent to the hospital to be checked over.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Vehicles and Driving**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- Consider training in short term stops procedures
- Ensure all workers are aware of site layout and prestart covers vehicle movement and access/egress to worksite

Distribution of Notice:
