

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	7/11/2022	Time of Incident:	11.45am
Directorate / Region:	Kimberley Region	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Injury - Illness	EQSafe Incident Number:	28918
Actual Consequence:	Moderate	Potential Consequence:	Moderate

Incident Short Description:	Operator slipped and twisted knee when exiting truck resulting in an LTI
------------------------------------	--

What Happened:

On Monday the 7th of November an incident occurred on Northern Minerals Road, 52km from the Duncan Gordon Downs Road Upgrade camp site office. A truck operator was assisting with the installation of permanent signage and guideposts. As the operator was exiting the truck (6-wheel end tipper) he slipped and twisted his knee.

The operator had three points of contact when exiting the truck, both hands on the handrails and feet on the steps.

A strong gust of wind blew the door towards him causing loss of balance which resulted in the right foot twisting, which caught on the step. The left foot caught behind the right foot, forcing the left knee to twist. The operator was able to safely make it to the ground.

The Site Engineer was notified, and the operator took paracetamol and iced both knees. The operator has now been admitted to hospital to receive treatment. It seems the injury has aggravated previous knee surgery that was done earlier in the year.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Fall from Height**

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- Use three points of contact when entering or exiting equipment, meaning both hands and one foot or both feet and one hand are always in contact with the truck at all times.
- Always face the equipment when climbing on or off equipment and keep your body as close to the equipment as possible.
- Do not hurry and NEVER jump from an elevated position.
