

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	11/11/2022	Time of Incident:	0945
Directorate / Region:	MWG	Main Roads or Contractor:	Contractor
EQSafe Event Type:	SHW Incident - Health	EQSafe Incident Number:	29007
Actual Consequence:	Minor	Potential Consequence:	Major

Incident Short Description:	Worker covered in quick lime
------------------------------------	------------------------------

What Happened:

On November 11 at 9:45am, a worker was assigned the task of clearing a quick-lime blockage within the delivery line of a mobile bulk tanker.

Steel delivery pipe flanges were separated, and within the work method; approximately 250kg - 350kg of quick-lime was dispersed onto the ground and surrounding area.

The worker involved stated upon opening the dump valve, the stored air pressure released onto the quick-lime and consequently this resulted in being covered by the circulated lime in the air.

The worker ceased the task, and upon approach to provide self-treatment at the toilet amenities additional assistance was provided to decontaminate the worker.

Quick-lime released under tanker

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Hazardous Substance**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- Initial treatment administered immediately
- Follow the Safety Data Sheet
- Diphoterine transferred from Supervisor Ute to Tanker
