EQSafe Event Type:	Damage/Loss	EQSafe Incident Number:	29249
Actual Consequence:	Insignificant	Potential Consequence:	Major

Incident Short Description:	A six wheel tipper impacted a member of public (MOP) vehicle
------------------------------------	--

What Happened:

A six wheel tipper was travelling north bound on the Mitchell Fwy (just before Erindale off ramp), when the tipper driver moved over a lane (to the centre lane) to allow for safe passing room as they passed a stationary Main Roads Truck Mounted Attenuator (TMA) assisting a truck breakdown in the emergency lane.

After passing the TMA and truck, the tipper driver indicated to move back over into the left lane to prepare to take the next exit. As the tipper driver moved into the left lane they made contact with the rear righthand quarter panel of the MOP vehicle, forcing it around and in front of the six wheel tipper.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Vehicles and Driving**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- *Drive to the conditions, ensure sufficient space between vehicles when driving and overtake with extreme caution only when there is sufficient line of sight. Also give consideration to length of vehicle being overtaken and ability to safely merge back into lane, maintaining safe speed with potential for unexpected events*
- *Ensure vehicles are maintained and prestarts are undertaken to ensure safety features are operational before use*
