

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident:	15/02/2023	Time of Incident:	12:20pm
Directorate / Region:	IDD	Main Roads or Contractor:	Contractor
EQSafe Event Type:	Damage/Loss	EQSafe Incident Number:	30028
Actual Consequence:	Moderate	Potential Consequence:	Major

Incident Short Description:	Moxy has slipped down embankment causing rear of machine to roll onto its side.
------------------------------------	---

What Happened:
A Moxy had received a load of fill and was heading Eastbound at approx. 15km/h. A grader and another Moxy were heading Westbound on the alignment at approx. 20kph. The Operator of the Moxy Involved has moved to the South of the alignment in an effort to avoid the plant heading towards him. The Moxy moved too far to the South toward the edge of the embankment (approx. 1m high), resulting in a slippage of the Moxy's back tyre down the embankment and the tray of the Moxy tipping over. The Operator was not injured in the Incident.

Moxy Rollover left side.

Moxy Rollover right side.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to **Mobile Plant Incident**.

Immediate Actions:

Please note that these are generic actions for all to consider in relation to this critical risk (and is not reflective of this specific incident):

- Review Vehicle movement plans to ensure adequate for site layout and activities
- Review protocols for communication between Plant operators and ensure understood by all operators

Distribution of Notice:

Main Roads Personnel and Contracting Organisations
