SHW Serious Incident (SI) – Final Notice

Date of Incident	8 April 2024	Time of Incident	12.30pm
Directorate / Region	Kimberley	Main Roads or Contractor	Contractor
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	39477
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Worker tripped on windrow, landing on knee
-----------------------------------	--

Executive Summary

On the 8 April 2024, a mechanic had arrived at a pit to repair the crushing plant operated by contractors. On arrival, the Injured Person (IP) has gotten out of the crusher cab to assist.

The area had been cleared of the bulk of crushed material, leaving two small windrows approximately 30 cm high. The operators and the mechanic were on the ground walking towards the conveyor discharge and were looking up at the conveyor when the IP has tripped on a low windrow, falling on their knee. The knee became swollen very quickly,

The IP has reported the incident to their supervisor. The IP was then conveyed to a hospital for medical assessment.

An X-ray and ultrasound later revealed that there was no damage to the knee, and the IP was declared fit to return to work on full duties the following day.

Incident Photos

Image of windrows under crusher.

Contributing Factors

- Location of windrows whilst performing maintenance check had not been identified as a hazard.
- Worker, by looking up, had lost situational awareness of where their feet were in relation to the windrow.
- The surface gradient was uneven due to windrow placement.
- Maintenance checks on crusher at place of operation was a routine task that needs to be reviewed.
- The procedure / Safe Work Method Statement (SWMS) / Safe Work Instructions (SWI) was not available on site.

Corrective Actions

- Conduct monthly Toolbox Meeting, focusing on situational awareness.
- Verify that the Contractor has a procedure for performing maintenance and servicing on the crusher, and that the procedure has been communicated to all personnel.

Additional Issues / Learnings

- Nil

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
