

RED BANNER ALERT

SHW Serious Incident (SI) – Preliminary Notice

Date of Incident	23 February 2024	Time of Incident	Approx 10:30
Directorate / Region	RMO – MWG	Main Roads or Contractor	Contractor
EQSafe Event Type	Damage / Loss	EQSafe Incident Number	38338
Actual Consequence	Minor	Potential Consequence	Major

Incident Short Description	MoP Heavy vehicle loses load and damages TC light vehicle
-----------------------------------	---

What Happened

During demobilisation from the pavement repairs project, a southbound traffic management contractor's light vehicle (LV) was approaching a bend when they observed a northbound Member of a Public heavy vehicle travelling towards them over the centre line of the road. As the heavy vehicle swerved back to the left-hand lane a large steel cylinder fell from the trailer and struck the traffic control vehicle as it passed.

The light vehicle sustained damage to the front end, deploying the airbags.

There were 2 occupants onboard the LV. Both were taken to Mt Magnet for medical assessment with no injuries resulting from the impact. WAPOL also attended the scene for investigation.

Steel cylinder – lost load from heavy vehicle

Damage to contractor's light vehicle

Size of steel cylinder in relation to person.

Bend in road where incident occurred.

A formal ICAM investigation has commenced. Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incident aligns with the Main Roads Critical Risk profile relating to
Vehicles and Driving
