WESTERN AUSTRALIA**SHW Serious Incident (SI) – Preliminary Notice**

Date of Incident	14 May 2024	Time of Incident	6:37am
Directorate / Region	RMO – Metropolitan	Main Roads or Contractor	Main Roads
EQSafe Event Type	Injury / Illness	EQSafe Incident Number	40534
Actual Consequence	Moderate	Potential Consequence	Moderate

Incident Short Description	Worker injured whilst replacing damaged posts, resulting in LTI
-----------------------------------	---

What Happened

On Tuesday 14 May 2024, a crew was scheduled on a night shift to replace damaged wire rope barriers.

After installation of the posts, they were inserting wire back into the post using a crowbar. During this process, the Injured Person (IP) felt a sudden yank on their shoulder. The IP continued to work the remainder of their shift. The next day they felt pain in their shoulder. The IP worked the following two shifts without reporting the incident. Five-day post incident, the IP rang a supervisor to report the incident and injury.

After being made aware of the incident, the supervisor has suggested the IP to seek medical assessment. The IP has reported to a GP who declared the IP unfit for work until 31 May 2024.

This incident has been reported to WorkSafe, and a formal ICAM investigation has commenced.

Once completed, the lessons learnt will be communicated/shared through a final Grey Banner Alert as soon as practicable.

This serious potential incidents aligns with the Main Roads Critical Risk profile relating to **Lifting Operations**
