

3.2 Generic Risk Register

The generic risk register below outlines the predicted risks which may be encountered during the works. The generic risk assessment varies from the Main Roads template and does not detail the direct reference to TGS/TMP number due to the large number of drawings and generic nature of the document. Any site-specific risks detailed below should provide a reference to the proposed TGS.

Table 7: Generic Risk Register

Item (Generic / Site Specific)		Risk Event	Consequence	Pre-treatment Risk			Treatment	Residual Risk		
				L	C	RR		L	C	RR
3.2. 1		Temporary Traffic Management Specifications								
3.2. 1	1 G	Temporary Traffic Management setups specified and recommended for use by an unauthorised or not adequately qualified person causing confusion for Traffic Management Personnel resulting in an exposure to unnecessary risk environments.	Serious injury or fatality to Traffic Management Personnel.	B	4	V16	The Traffic Management Assessor or Project Delivery Supervisor must be adequately qualified to specify the proposed drawings and training provided where necessary. Review and endorsement for the proposed Temporary Traffic Management setups must be provided at the planning stage to ensure no significant impacts will occur. Section 7 of this Traffic Management Plan outlines the recommended implementation qualification and experience when specifying each Traffic Guidance Scheme. Refer to section 4.2.2 of the MRWA CoP for selection qualifications.	D	4	M8
3.2. 1	2 G	Temporary Traffic Management setups specified not appropriate for the traffic, speed or environment conditions causing confusion for motorists resulting in an exposure to unnecessary risk environments.	Serious injury or fatality to road users.	C	4	H12	The Temporary Traffic Management Assessor or Project Delivery Supervisor must be adequately qualified to specify the proposed drawings and training provided where necessary. Review and endorsement for the proposed Temporary Traffic Management setups must be provided at the planning stage to ensure no significant impacts will occur. Traffic Management Personnel may adjust or change the site where a significant safety hazard is identified with appropriate approval and risk assessment. Refer to section 4.2.2 of the MRWA CoP for selection qualifications.	D	4	M8
