

Item (Generic / Site Specific)		Risk Event	Consequence	Pre-treatment Risk			Treatment	Residual Risk				
				L	C	RR		L	C	RR		
3.2	17	2	G	Proposed turning restrictions causing restricted access for local business, residents and schools resulting in adverse public reaction.	Adverse public reaction.	C	3	M9	Local detours must be provided for the turning restrictions. Works may be restricted to night works where traffic volumes are reduced as required.	D	3	L6
3.2	17	3	G	Motorists on detour route becoming lost or confused at intersecting roads resulting in adverse public reaction.	Adverse public reaction.	C	3	M9	All required detour signs to be installed along the detour route as required. Local letter drops and pre-communication may be implemented prior to the implementation of any turning restrictions to notify of potential changes.	D	3	L6
3.2	17	4	G	Traffic volumes unavailable for affected side roads causing unknown impacts to surrounding road network during proposed turning restrictions resulting in adverse public reaction.	Adverse public reaction	C	3	M9	Traffic congestion and delays to be monitored for the duration of the works. Where excessive congestion occurs, the TM is to be removed and traffic allowed to clear.	D	3	L6
3.2. 18		Public Transport Authority Network Impacts										
3.2.	18	1	G	Temporary lane alignments and closures may restrict access for public transport vehicles resulting in adverse public reaction.	Adverse public reaction.	C	3	M9	Bus stops in the vicinity of the works will be assessed for impacts. Liaison with Transperth to determine potential impacts and solutions must be conducted prior to implementation. Where possible, all bus stop locations are to be maintained however, if relocation or removal is required prior approval from Transperth is required.	D	3	L6
