

Variable message signs may be used for short-term works outside a traffic lane as a means of secondary protection to workers. The use of variable message signs must be within 40 m of workers. A distance of greater than 40 m between the variable message sign and workers may be misleading to approaching road users about the location of works.

Table 5.4.5(a) – Sight distance for lookout person – Short term works outside a traffic lane – but within 1.2 m of a traffic lane

Speed (km/h)	Distance (m)*
≤ 45	80
46–55	100
56–65	120
66–75	140
76–85	160
86–95	180
96–105	200
≥ 106	220

* Note: These distances are based on a maximum distance of 3.5 m between road workers' location and their escape to a shoulder or median. For longer escape routes additional sight distance will be required and the sight distance provisions for the Lookout Protection Method, in the [Guideline – Traffic Management at Works on Roads](#) must be applied.

Table 5.4.5(b) – Sight distance to both the vehicle-mounted warning device and the worker – Short term works outside a traffic lane – but within 1.2 m of a traffic lane – lookout not required

Speed (km/h)	Distance (m)
≤ 45	140
46–55	180
56–65	210
66–75	250
76–85	280
86–95	320
96–110	350
> 110	A lookout person is required
